How should we
advise the
Governor?
(Refine & Prioritize)

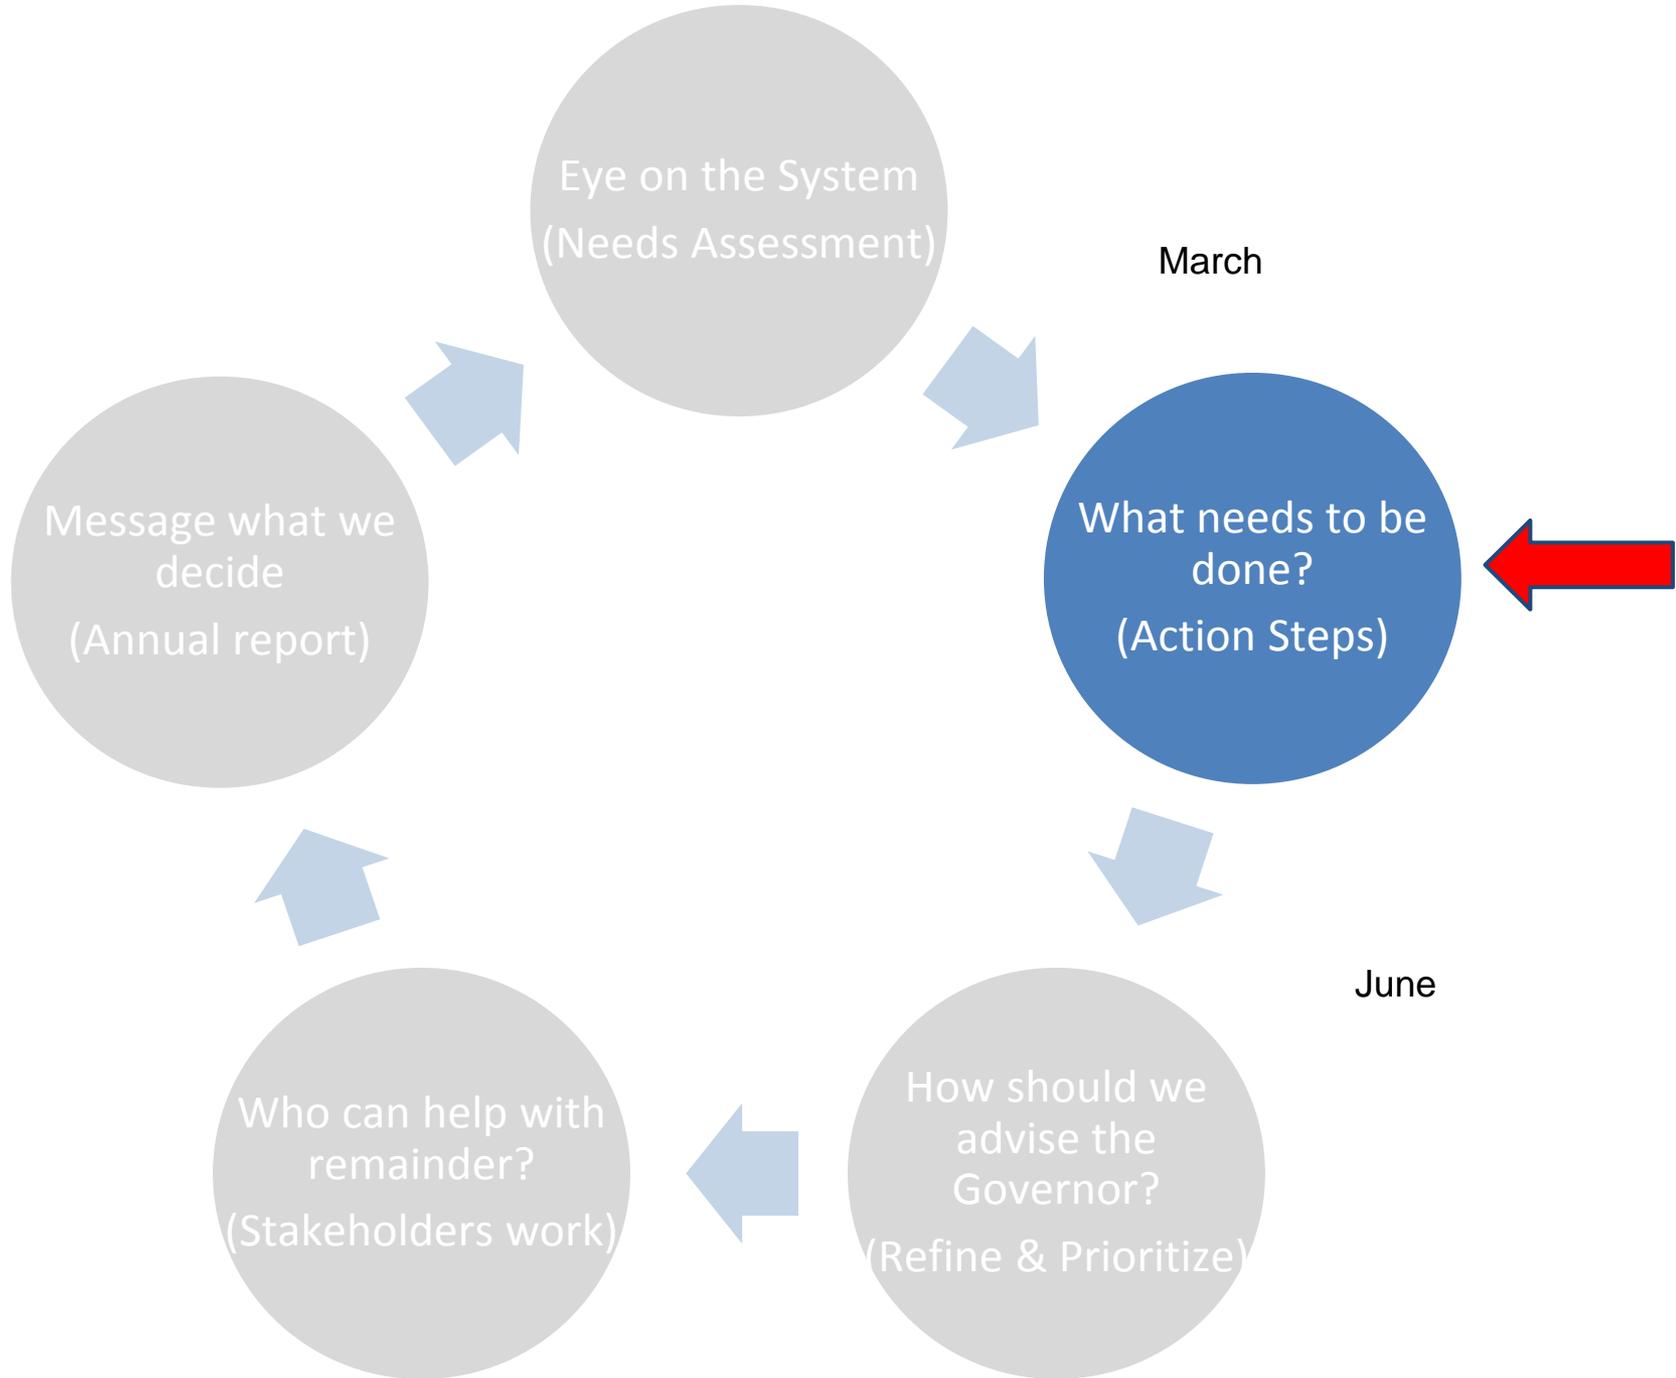

December

Eye on the
System
(Needs
Assessment)

March

- Review recommendations from the previous year
- Review any action that was taken
- Determine what new information is needed
- Determine how information will be gathered from the field
- Gather feedback from stakeholders
- Analyze the data gathered

What needs
to be done?
(Action Steps)

June

- Review the analysis of the needs assessment
- Determine what gaps remain in Wisconsin's EC system
- Communicate the gaps and gather input from stakeholders
- Generate a list of proposed priority areas to fill the gaps that align with the Governor's Executive Order and the priority areas of the Council. This list should be based upon stakeholder and expert feedback and research.
- Narrow the list to a reasonable number—potentially using a survey, have everyone select their top 8 priorities that would have the greatest impact.
- Form/utilize work groups—one for each priority area (approx. 5-10 based upon survey results).
- Work groups look at research, cost/benefit, feasibility, speak to experts, consult with organizations, current WI project teams/groups, etc. of their priority area to identify key action steps and/or recommendations.
- Work groups develop a recommendation paper to present to the ECAC using a standard template.

June

August

June

August

- Each of the work groups presents their recommendation area to the ECAC
- The ECAC determines what recommendations will be presented to the Governor.
- The ECAC finalizes approximately 3-5 recommendations.

August

September

- The ECAC looks at action steps that surfaced as strong options that do not require the action of the Governor.
- The ECAC determines what other stakeholders might be able to assist with filling these gaps. (Any recommendations to the departments must already be approved by the departments)

September

December

- An annual report is created, that focuses on recommendations of the ECAC.
- Report should be short, clear, and in simple terms.
- Recommendations to the Governor should be front and center, in clear language for what actions we recommend he take.
- Recommendations for other stakeholders could be included (if department recommendations they should already be approved by the Secretary and Superintendent)
- Consider a one-page flyer to share with the Governor, Legislators, and other stakeholders.
